

Boost your bottom line with customized solutions to maximize your ROI

What is CFG Insolvency Accelerator?

Accelerate your value from insolvent accounts while minimizing your overhead costs with our customizable and scalable insolvency receivables purchasing and/or administration platform.

- ▶ **Real-Time Reporting:** We offer enhanced decision-making through customizable, real-time reporting and analytics capabilities
- ▶ **Scalable Service Capabilities:** We provide service and sale capabilities according to your defined needs
- ▶ **Centralized Information Control:** We establish centralized control over information exchange with trustees

Be sure to check out www.canaccede.com/cfg-accelerator-suite/ for more details.

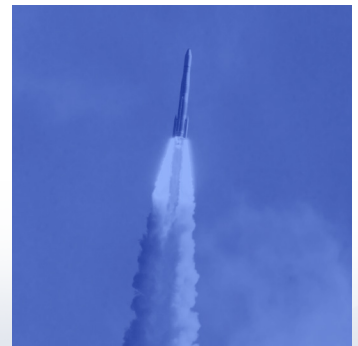

Our insolvency purchasing and servicing products are specifically designed to help organizations de-leverage and de-risk during liquidity challenges at times of market upheaval.

How it works

The CFG Insolvency Accelerator product is a complete purchase and service solution. We offer servicing and purchasing functions that allow you to choose how to best optimize your returns. We give creditors the flexibility to pick the solution they want. Whether it is solely servicing, or having Canaccede process and monetize accounts, there is a tailored solution for any need.

Our insolvency management platform (CFG Stream) is an advanced SaaS-based technology built using an infrastructure that is customizable to specific client preferences.

We deploy directly into clients operational sites and provides an interface to receive notices of insolvency, input account characteristics, monitor and report on financial and activity trends, and receive custom alerts. We work with you to maximize results, minimize operational costs, and reduce capital requirements.

The CFG competitive advantage

Canaccede can customize the delivery of business process solutions across the customer lifecycle - we offer what the competition does not.

Volume Fluctuation Management

- Record and categorize number and type of documents as soon as they are received
- Flex staff on short notice based on insolvency volumes

Portfolio Workflow Management

- Review estate and account information in one single page
- Easy access to all data points needed for processing insolvency notice

Reporting

- Customize reporting dashboards with intuitive user interface
- Easy access to real-time information on all files

Dividend Follow-Up

- Automated follow-ups with trustees on all files requiring attention
- Receive payments and updates in a timely manner

Secured Communications

- Directly communicate through system-of-record API
- Categorize messages/requests to assign responsibilities and prioritize tasks

Proposal Review and Voting

- Leverage system machine logic and human review to maximize return on Consumer Proposals while minimizing annulments

How we create value

Partnership

Business and industry leaders partner directly with us for innovative turn-key and custom debt solutions because we understand your needs and challenges better than anyone else. Close collaboration with our partners is a pillar of our success.

Insights

Our unique access to critical and relevant data points is leveraged for you in our streamlined industry reports. Key insights, baseline metrics and best practices are essential to unearthing customer demand opportunities.

Capacity

Improving and growing your capital position is our core priority. Selling and outsourcing institutional debt recovery increases your capacity to leverage and maximize resources that ultimately improves your bottom line.

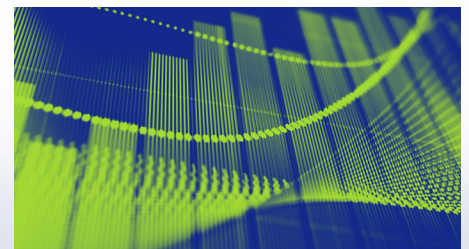

Risk

We minimize the risk and expense of processing insolvency recovery volumes by providing fixed-recovery value through forward flow sales. We ensure compliance within the dynamic regulatory framework and follow all provincial and federal laws and regulations. Our data management protocols adhere to advanced privacy and security protocols.

Solutions

We are driven to plan and build innovative custom debt solutions that solve our client needs and challenges. Our established and collective expertise as industry leader gives us a unique position to forecast, understand and react to market needs.

Impacting your bottom line

Canaccede is able to customize the delivery of business process solutions across the customer lifecycle. We offer what the competition does not.

Finance

We purchase forward flows to improve your capital and operational expenses. We purchase forward flows to improve your capital and operational expenses.

Upfront sales allow for more explicit valuation of assets on the balance sheet and generates a lower net credit loss rate against the corporate income statement. Additionally, the elimination of internal processing, monitoring and managing of receipts with forward-flow sales can reduce vendor costs.

Operations

Automated Data Digitization Engine

- Insolvencies processed with speed, scale and accuracy for increased returns
- Immediate creditor package digitization in both French and English
- API Gateway fully automates document retrieval and provides real-time data tracking from creditor / debtor packages

Enhanced Decisioning Automation Solution

- Enhanced Decisioning Automation engine uses machine learning tools to analyze insolvencies in real-time

- Greater creditor efficiency and transparency of insolvent customers - improves quality of decisions to the trustee
- Engine evaluates multiple criteria to adjudicate consumer proposals for maximum returns during voting process
- Engine fast-tracks creditor packages and expedites proposals requiring additional review

Advanced Reporting

- Insolvency processing, including detailed reporting and Trustee follow-ups are available quickly and accurately through flagship our CFG Stream Platform

Technology

Our solution offers flexibility and scale to meet fluctuating debt volumes including Automated Data Digitization, an enhanced decisioning solution and advanced reports.
